

Gel Nails Aftercare

Making sure you look after your nails following treatment is important, please read carefully below and follow these instructions of what should and should not be done.

- Do not use polish remover as using any form of removing solution will affect the top layer and potentially remove the colour underneath
- Do not pick at your nails as this will cause your gel polish to peel and could cause damage to your natural nail
- Do wear gloves whilst doing housework / washing up as harsh chemicals could break down gel polish
- Do return to salon for regular maintenance, this is recommended every 2-4 weeks
- Do apply cuticle oil daily especially if your cuticles are dry or cracked. This nourishes the natural nail as it grows keeping them in a healthy condition

If you suffer from any of the following you must immediately get in touch with PURE

- Fingers become swollen after 24 hours
- Your natural nail feels sore

If you have any queries please do not hesitate to contact us.

Thank you for choosing PURE Holistic Beauty for your nail treatments....Have you booked your next appointment yet?
